Speaker Bios:

Amy Rousseau is the PFAS Response Administrator for the NH Department of Environmental Services with the MtBE Remediation Bureau. She has been in State service for eight years, previously serving the Drinking Water and Groundwater Bureau as a Small System Engineer providing technical assistance to seasonal and other small public water systems. Prior to State service, Amy worked in private consulting as an environmental engineer with a focus on environmental/hydrogeologic investigations, hazardous waste site characterizations, and remediation projects. She holds a Bachelor of Science in Environmental Science from SUNY Plattsburgh and a Masters of Engineering in Environmental Engineering from Clarkson University.

Krystle Mallory, BSN, RN-BC (she/her) began her Public Health Nursing career at the New Hampshire State Prison for Men in 2012, later transitioning to the Secure Psychiatric Unit in 2015. In 2017, Krystle took the opportunity to join the Division of Public Health Services where she currently serves as the Interim Nurse Manager within the Bureau of Infectious Disease Control overseeing the Infectious Disease Emergency Response Program. Krystle lives with her husband and two young children, with whom she bakes and enjoys outdoor adventures whenever she can.

Colleen Smith is the Administrator of the Food Protection Section for the state of New Hampshire. The section has food safety and licensing oversight for over 5,000 food establishments in New Hampshire which includes retail food establishments, food processors, dairy farms and plants and shellfish harvesters and dealers. She has been with the Food Protection Section since August 2008. Prior to joining the state, Colleen has over 12 years of food industry experience, holding positions in Research and Development and Quality Control. Colleen holds a MS in Food Chemistry from the University of Wisconsin-Madison.
